Beautiful Products – The GB Masonry collection has been a symbol of quality in the masonry industry since 1978 when our company was founded. For products that show the skill of master craftsmen there is no rival to the GB Masonry collection of premium masonry.

Our Range – GB Masonry sources the best quality sands and aggregates, achieving distinctive colours and finishes thanks to outstanding attention to detail and extensive expertise. Our masonry products have become a hallmark of architectural style and design, with a range that includes sleek honed options, bold textured finishes in the split face and rock face ranges, and the timeless style of our smooth finished ranges.

The Benefits –

When considering building products to use on your project it is important to understand all the pros and cons before making your final selections.

1.

Low maintenance
Minimal maintenance, maximum impact. You're guaranteed a long-lasting, tough, and easy to care for solution.

2.

All-weather resistant
Heavy storms. Blistering heat. Sub-zero frosts. Our products are designed to hold up to anything our weather systems are capable of throwing at it.

3.

Fire resistant
All of our products are non-combustible and highly fire resistant – making them ideal for bushfire prone areas.

4.

Termite resistant
With no organic wood materials present in our concrete formulations, our masonry range is naturally termite resistant.

5.

Simple installation
Easy to install and structurally robust – our products are perfect for 'do it yourself' installations.

6.

Environmentally aware
We've redesigned our production processes to minimise effects on the environment ensuring they do not deplete precious natural resources

7.

Impact resistant
Our masonry range is also renowned for its toughness and hard-wearing properties, and can handle impacts from many external forces.

8.

Marine safe
Our products are rated as exposure grade which means they are resistant to salt attack and therefore ideal for use in coastal locations.

Ideas for inspiration

Whatever your ideas, we have the products to turn them into reality.

Bricks and Advanced Brick Systems
We offer Australia's largest collection of bricks, with an extensive range of colours and finishes. Our advanced brick systems offer a brick finish with increased speed and ease of installation.

Blocks and Breeze Blocks
Our block and breeze blocks are available in an extensive range of colours, sizes, solar roofing selection. Practical and finishes designed to complement clean-lined, modern architectural designs, designed to add style to your project whether residential or commercial.

Pavers
We offer a vast paving range which includes a range of styles, colours and finishes to suit modern landscape designs.

Natural Stone
Our Granite, Marble, Limestone and Porcelain flooring products are crafted to complement inspired outdoor spaces.

Retaining Wall Blocks and Concrete Sleepers
Our retaining wall range offers options to suit DIY, general landscaping or large scale commercial retaining wall applications.

Wall Cladding
We offer a collection of ceramic, terracotta and natural stone wall cladding products crafted to suit residential and commercial applications.

Limestone Blocks*
The limestone block range is sourced through quarries in Western Australia with two finishes available to complement the natural limestone colour.

Mortar and Accessories
From preblended mortar, to concrete sealers and mortar additives, we offer a host of installation accessories.

Backed by Brickworks –

Local expertise. Global quality. Brickworks Building Products are one of Australia's biggest building material manufacturers. With heritage going all the way back to one of Australia's founding brick producers, we're proud of our reputation for design, innovation and sustainability.
