A REPUTATION FOR QUALITY

Product – Hawthorn | London

3 Architect – Cumulus.Studio | Photography – Anjie Blair

A Legacy in Brick – The story of Daniel Robertson begins in 1853 when John Robertson imported Welsh roofing slates as ballast in sailing ships into Melbourne.

He was soon providing all forms of roofing, including terracotta tiles, across his newly adopted hometown and in 1910 the company commenced its first manufacturing venture producing concrete roof tiles in Whiteman Street, South Melbourne.

To this day, many of Melbourne's most notable buildings still feature those original, Daniel Robertson roofs. But it wasn't until 1928 that the company sealed products manufacturer Brickworks

In that same year, it launched a unique range of rustic bricks as an alternative to the smooth-faced options only available at the time. They were an instant hit. Demand for this new product soon became so great that roof tile production was phased out within two years to focus on manufacturing bricks.

In 2012 Australia's largest building

its reputation for quality craftsmanship after acquiring Tunstall Brickworks in Nunawading and converting it for the production of terracotta tiles. The transition to red clay products proved extremely successful and business grew rapidly. By 1967 the company was a leader in the field, researching and developing new colours, shapes and textures.

Building Products group acquired the company. Under this well respected banner, Daniel Robertson continues to deliver excellence and innovation in architectural brickwork. There are simply no better premium quality bricks available today.

Unique Character and Style – In a world of mass production, these crafted clay bricks are highly valued for their unique character, earthy appeal and individual charm. Developed through years of tradition, they are kiln fired to produce bricks which have distinctive colour and textural variations.

Sustainable and Carbon Neutral –

Daniel Robertson bricks made in Tasmania have achieved the enviable goal of Carbon Neutral certification under the Australian Government's National Carbon Offset Standard.

This feat has been largely achieved by using biofuel as the main firing fuel for our kilns at our Longford plant. Thermal mass, energy-efficient design, reusability, and the fact that bricks do not require resource-hungry finishes such as paint or render to maintain their good looks and durability, all add to our sustainability credentials.

Certified by Climate Active Sustainability is important to us and we are committed to being concerned for and respecting the environment. Daniel Robertson bricks are certified carbon neutral which means that they have no net impact on the climate.

We are taking responsibility for our emissions through energy efficient production methods and investing in reforestation and renewable energy projects. Visit climateactive.org.au for more information about our carbon neutral certification.

Designed to Last –

Versatile in design, durability to last a lifetime, the highest thermal comfort and with low maintenance upkeep, clay bricks tick all the boxes for homes and projects with value and sustainability in mind.

-
1.

Low maintenance

Noneedtopaint or perform other treatments to maintain their aesthetics and durability. They are strong, reliable and relatively maintenance free.
2.

Affordable

Costeffective building product materials that increase the value of your investment or project from day one, for generations to come.
3.

Energy efficient

Combined with intelligent passive building design elements, clay bricks can help moderate building temperatures and reduce energy consumption.
4.

Strength and safety

Clay products are stronger than other light weight materials and also provide a safer and more secure home from the outside environment.
-
5.

Naturally sustainable

Clayis anatural resource which has been used for centuries because it retains its colour forever as well as its durability. Architects, engineers and specifiers continue to appreciate the advantages of using clay products.
6.

Peace of mind guaranteed

DanielRobertson bricks are backed by an exclusive Brickworks 100 year product warranty.

Daniel Robertson 470 Collection

Made in TAS

Timeless elegance meets modern design in the Daniel Robertson 470 Collection—a highly sought-after range of long-format bricks crafted to elevate any space. Available in our signature Traditional and Hawthorn colourways, these bricks feature a richly textured face that brings warmth, depth, and character to new builds, renovations, or striking feature walls. The extended proportions create a sleek, contemporary aesthetic while maintaining the handcrafted charm Daniel Robertson is known for.

Just like the magnificent wide-ranging beauty of Tasmania, each brick has been created so each double-face is inherently unique in colour and form, but with an extraordinarily natural 'reclaimed' feel. Much the same as the weathered landscapes that inspired this collection, these bricks will delight for generations to come.

Mortex

Mortex is a factory manufactured, quality assured premixed M4 rated mortar solution. Its consistency can save labour time, increase efficiency, remove the need for on site blending, and it is compliant with AS3700:2018. Mortex takes the guess work out of mortar blending and reduces the potential for under strength, non compliant mortar use.

Mortar Finishes

There are four common mortar finishes and these various finishes result in different shadow lines on the wall. A raked finish will create a deep shadow in the mortar joint. This brings out the horizontal lines of the brickwork (and the vertical lines to a lesser extent) and it is the most common finish. Ironed and struck joints also create shadow lines, but these are much finer and more subtle. A flush joint doesn't allow shadow lines to form at all, giving the wall a flatter, more unified look. Using a mortar colour to match the brick will take this a step further.

Ironed

Struck

Flush

Mortar Colours

Whitemortar is currently the most popular colour. This is made by mixing light coloured cement and white sand and results in a traditional brick and mortar look. Mortar can be coloured by adding powdered or liquid pigments to the mortar as it is being mixed by the bricklayer. It can also be tinted to match the brick colour, giving a very even wall colour. Please confirm with your bricklayer what their mortar colouring offering is before making your final decision.

Discover More –

Inspiration doesn't always come naturally, and your project is going to be there for a long time, so it's worth taking your time to enjoy the creative process. From visiting us at our Design Studios, and exploring our iVisualise Tools online, to chatting in person or over the phone, we're here to help.

Discover

BrickworksDesign Studios

Your localBrickworks design studio is a one-stop destination for advice and inspiration, where you can experience the quality of our product range first-hand. Our experienced consultants will guide you through the range and help you find the best possible solution for your project – within your budget.

Create

iVisualise Tools

Using artificial intelligence and digital technology, you're now able to experience colours, forms and profiles with our online colour visualisation tool. iVisualise helps make selection seamless and simple – whether you're looking for a traditional product, or something more contemporary.

Learn

Colour Consultations

Building orrenovating a home is a major investment – and it should be an enjoyable experience for you. We can help with a one-to-one colour consultation where our experts can guide you on colour trends, the right fit and style, and ideas that will give you a genuinely individual look.

Backed by Brickworks

Local expertise. Global quality. Brickworks Building Products are one of Australia's biggest building material manufacturers. With heritage going all the way back to one of Australia's founding brick producers, we're proud of our reputation for design, innovation and sustainability.
